

Languages Faculty

Our Aims

We offer a wide range of options that will cater to all, whether one is a beginner, or continuing one's mother tongue languages. Through the learning of these languages, we aim to have the learners communicate effectively and attain all the language skills, namely speaking, listening, reading and writing. It also offers insights into the culture of these countries and forms a sound base of the language for further study, work or leisure.

Our Approach

The four language skills are developed in an integrated approach through various activities. Besides textbooks and assigned texts, we also use visual and audio materials such as songs, movies, video clips and interactive websites. Materials ranging from newspaper articles to novels to comics are used to expose our students to apply the languages in our daily lives. Students in class are also encouraged to participate actively in classroom discussions and doing presentations.
