

# HER FUTURE DEPENDS ON YOUR DECISION TODAY

Protect your daughter against cervical cancer  
with the HPV vaccination.

For more information,  
email [HPB\\_mailbox@hpb.gov.sg](mailto:HPB_mailbox@hpb.gov.sg) or call **6435 3895**  
(Mon to Fri: 8am-5pm, Sat: 8am-1pm, closed on Sun & PHs).

# HPV RISKS & PREVENTION

HPV stands for human papillomavirus.

Out of over 100 types of HPV, 2 types are responsible for 70% of cervical cancer.

**Here's why the HPV vaccination is important for your daughter, and works best when given at a younger age.**

## HPV vaccination

**9-26** years old

Those younger than 15 years old require 2 doses; while those aged between 15 and 26 require 3 doses

**safe**

HPV vaccines can be given safely together with other vaccines

**effectiveness**

Offers long-term protection against HPV

## Cervical cancer

**leading cause**

HPV is the leading cause of the most common female cancer (cervical cancer)

**new cervical cancer cases**

diagnosed annually in SG\*

**cervical cancer deaths**

in women aged 15-44 in SG annually\*

*All vaccines may have side-effects and are usually mild such as pain, fever and feeling weak.*

Figure provided by HPB/NRDO, estimated from 2011-2015 data\*
